

University of Alberta Archives

Accession No. 89-35

Descriptive Inventory

M.G.

1989-05-23 DW

Dr. Max Wyman

Scope and Content Note

This accession is the fifth accrual which together with 83-60, 84-1, 84-63 and 85-62 constitute the Dr. Max Wyman fonds. Although 40 centimeters of material was received for the current accession, only 2 centimeters were selected for the University Archives. The majority of the material consisted of journal reprints which either bore no organic relation to the Max Wyman fonds or were already part of previous accessions. A portion of this material was forwarded to the University of Alberta Department of Mathematics Library; the remaining material, along with 6 centimeters of ephemera and duplicates, was discarded.

File Inventory

<u>Box</u>	<u>Item</u>	<u>Description</u>	<u>Date</u>
